Based on data from the Smarter Summative , 2014-2015 administration.

Report Generated: 9/8/2015 10:56:59 AM PDT

*Standard error is not defined for groups of one student.

The data available in this reporting system represent partial and preliminary results that are not appropriate for public release. As a real-time system, results will change as additional data is received and relevant appeals and rescores are processed. These changes may result in final scores being higher or lower than the preliminary results posted to this system. Final data will be released publicly by the California Department of Education in August.

A student's score is best interpreted when recognizing that the student's knowledge and skills fall within a score range and not just a precise number. For example, 2300 (+/-10) indicates a score range between 2290 and 2310.

There is some uncertainty in all test scores. If these students took the test multiple times, their average score would lie within the range indicated next to the average scale
