

## TIP Therapeutic Intervention Program

## Student

A student is identified as having a crisis or may have a presenting issue (i.e. signs of depression, anxiety, selfharm, etc..)

Step A: The Psychologist/Guidance Counselor/Associate Principal meets with the student and determines that the student's crisis or symptoms are not severe to make referral to TIP Clinician. The Psychologist/Guidance Counselor provides the service to the student.

Step 1: The student is referred to Psychologist/Guidance Counselor/Associate Principal. IF

Step A: The Psychologist/Guidance Counselor/Associate Principal meets with the student and determines that the symptoms are severe and warrant further evaluation.

Go to Step B

Step B: The Psychologist/Guidance Counselor/Associate Principal fills out the required referral form and obtains required signature from student's parent.

Only in a crisis situation (i.e. suicidal ideation, severe self-harm) can the parent signature be waived with verbal consent of the parent; school representative must sign the parent signature line stating that the parent has been informed and agrees to student being treated by TIP staff.

Go to Step C

Step C: The student's presenting issues are considered severe and require further evaluation and/or intervention. The TIP Clinician will coordinate services for the student to receive a high level of care service.

Go to Step D

Step D: The End
